Gender Pay Gap Report - 2023

Introduction from Chief Executive, Dame Laura Lee

Our ambition is for Maggie's to be there for everyone with cancer. Our long-term aim is to make sure that Maggie's is available at all 60 NHS cancer sites across the UK. We will ensure that nobody living with cancer is unable to access the expert psychological, practical and emotional support they need to live the best possible quality of life.

Developing an inclusive, diverse, and supported organisation is vital in achieving this ambition. We are committed to ensuring that Maggie's represents and welcomes everyone, and reviewing our gender pay gap every year is essential to this.

This gender pay gap report is based on data from 5th April 2023. Our analysis is based on Maggie's 307 full-pay relevant employees in post on that date. Our gender balance was:

- 258 Women
- 49 Men

What is the gender pay gap and how is it calculated?

Organisations with more than 250 employees are legally required to report on their gender pay gap - or the difference in average earnings between females and males - in the following ways each year.

- The mean pay gap: the average amount earned by female employees compared with the average amount earned by male employees each hour.
- The median pay gap: the difference in pay between the middle-ranking female and male employees.
- The proportion of females and males in each pay quartile: this is calculated by splitting the overall workforce into four equal-sized groups, based on hourly pay and ranked from highest to lowest. The percentage of females and males in each quartile is then calculated.
- The pay gap between female and male employees who receive bonus payments (we do not make bonus payments at Maggie's, so we do not report on this). We then share our report on our website and the dedicated government website.

A note on language sex and gender

Despite being called the gender pay gap, this report is based on a binary definition of sex (as assigned at birth) rather than gender. This is because the regulations require us to report in this way and categorise our employees as either female or male, as stated on their legal documents (such as passport). This does not detract from our commitment to ensure that colleagues of all gender identities feel supported at Maggie's.

Our mean gender pay gap

Our mean gender pay gap is the difference between the average amount earned by female employees and the average amount earned by male employees each hour.

On 5 April 2023, when we captured the data for this report, our mean gender pay gap was -3.27%. This means that on average, men at Maggie's are paid 3.27% less than women. Which means that for every £1 a man earns at Maggie's, a woman will earn £1.03.

Our median gender pay gap

Our median gender pay gap is the difference in pay between the middle-ranking female and male.

On 5 April 2023, when we captured the data for this report, our median gender pay gap was -3.01%. This means that when using the median, men at Maggie's are paid 3.01% less than women. Which means that for every £1 a man earns at Maggie's, a woman will earn £1.03.

Our headcount of females and males in each pay quartile and
